MODULE

Market Research

Module code MR		Semester 1	Duration 1 Semester		ECTS-Credits 6	
Course type Mandatory		Teaching language German English Trail: English	Intake Winter semester		Hours per week (SWS) 6	
1	Lectures of the Module		Hours of presence	Hours of self-study	Total work-load (h)	SWS
	Advanced Market Research		18	42	60	2
	Applied Statistics		18	42	60	2
	Consumer Behavior		18	42	60	2
2	Content In terms of content the broad spectrum of qualitative and quantitative methods of the marketing- and market research will be conveyed and their use for demanding problems regarding the market- and consumer analysis will be demonstrated. Advanced Market Research The course Advanced Market Research deals with the qualitative spectrum of methods in detail (12 x 90 minutes). The planning of explorative study designs and the application and evaluation of psychoanalyzed interviews, focusgroup discussions as well as associated and projective techniques will be dealt with. Applied Statistics The course Applied Statistics deals in detail (12 x 90 minutes) with the types and possible applications of the process of the descriptive and statistical inference. The focus of attention will be on the use, the conduction, the evaluation and the interpretation of the results by means of uni- and multivariate analysis on the basis of practical examples. Consumer Behavior The course Consumer Behavior reinforces (in 12 x 90 minutes) scientific findings of models and results of the consumer behaviour. Besides the conveying of classical determinants for the behaviour in the context of the consumers like motives, values and lifestyles newer scientific behaviours and neurophysiological findings will be conveyed and possibilities of its analysis will be discovered practically.					

ISM-COURSE HANDBOOK

M.A. STRATEGIC MARKETING MANAGEMENT

3	Learning outcomes / Competencies The module imparts the perspective of information collecting within the context of a global marketing approach. The three courses of the module are generally used for the acquisition of broad as well as of profound knowledge in the market- and consumer research. Professional skills The students know qualitative and quantitative methods as well as scientific theories and rules for the analysis and the strategic marketing influence of the consumer behaviour. The student can evaluate tasks, which are market relevant, analyse the data, interpret it and weights its importance. Furthermore the student can manage to take adequate management decisions on the base of a critical evaluation of the findings. The student develops special problem solving skills by a practical and methodical analysis of problems and a solution-oriented evaluation of the results of the market- and consumer research. Personal competence The students will increase their personal, social and methodological competence by varying learn- and worksettings for the support of an independent development, planning, conducting and organization of the acquired theoretical and methodological knowledge in the context of marketing research. The students can develop their independency and learning competence as well as improve their communication and reflectional skills in a team context especially by the systematical practice of the module content on the basis of case studies in single- and group work formats. The students can practice their acquired knowledge individually, discuss and reflect possible solutions, as well as integrate complex results in to comprehensive marketing concepts.
4	Teaching and learning methods 10% lecture 10% free classroom discussions 30% work in small groups 15% case studies 30% research and analysis tasks 5% special features (e.g. guest speakers, site visits)
5	Prerequisites for participation Formal requirements: none Recommended prior knowledge: basic knowledge of data collection and statistics from undergraduate studies
6	Applicability for this and other programs of study Applicability of content in this program of study: "Market Research Project" in the second semester and master thesis. Knowledge from this module can also be of relevance for the internship module and the semester abroad. Applicability in other study courses: None

Strategic Marketing

Module code MAR		Semester 1	Duration 1 Semester		ECTS-Credits 6	
Course type Mandatory		Teaching language German/ English English Trail: English	Intake Winter semester		Hours per week (SWS) 6	
1	Lectures of the Module		Hours of presence	Hours of self-study	Total work-load (h)	SWS
	Marketing Strategies & Planning		18	42	60	2
	Brand Management		18	42	60	2
	Trademark & Unfair Competition Law		18	42	60	2
2	Content The module covers the broad spectrum of strategic marketing comprehensively. Strategic, operational and evaluative aspects have to interact efficiently within the marketing process. Marketing Strategies & Planning The course Marketing Strategies & Planning elaborates on the vast range of generic and specific marketing strategies, their indications and applications. The course focuses on the selection of appropriate strategies and their successful application under a variety of market conditions and for different kinds of products as well as service sectors. This provides the basis for the presentation of the instruments and conditions that are necessary for a successful transfer of marketing strategies into the tactical and operative implementation of these marketing instruments. The course focuses on the development of marketing plans that are based on strategic marketing concepts as well as the resulting options for a systematically consistent implementation. Brand Management The course Brand Management covers theoretical models as well as practice-oriented conditions for successful brand management in detail. It focuses on brand strategies, brand positioning, brand architecture management as well as processes of brand valuation and brand controlling. Trademark & Unfair Competition Law The course Trademark & Unfair Competition Law deals with the legal framework of German and international competition and trademark law, which determines the strategic scope of marketing management.					

ISM-COURSE HANDBOOK

M.A. STRATEGIC MARKETING MANAGEMENT

3	Learning outcomes / Competencies The module provides an activity/action-oriented perspective in the context of a comprehensive approach to marketing. The three courses of the module serve the acquisition of broad and profound knowledge in the areas of strategic and instrumental marketing. Expertise (knowledge and skills) Students possess scientific knowledge necessary to develop marketing concepts and are familiar with tools and instruments for their operational implementation and evaluation. They are able to develop promising marketing strategies based on the insights of market research and the specifications of corporate management and brand management. Their plans are target-oriented and they are able to monitor the effectiveness and efficiency of their solutions. Analysis, development of strategic concepts, operational orientation, evaluation and control of possible solutions in the area of brand management provide students with keen problem-solving skills. Furthermore, by dealing with legally problematic cases in the areas German and international trade law, students gain the skills necessary to assess and evaluate legal implications for corporate actions. General competencies (social competence and autonomy) Students attain an extension of their personal, social and methodological competences by different learning and work settings to support independent development, planning, implementation and organization of strategic and instrumental marketing activities. In particular, by systematically practicing the content of the module using case studies in individual and small group formats, students are able to develop their independence and learning skills as well as improve their communication and reflection skills, their teamwork and leadership skills in a group context: students can practice the acquired knowledge individually, discuss and reflect possible solutions, and learn to organize and integrate complex strategy, planning and coordination processes comprehensively and systematically.

M.A. STRATEGIC MARKETING MANAGEMENT

Classic Communications

Module code CC		Semester 2	Duration 1 Semester		ECTS-Credits 6	
Course type Mandatory		Teaching language German English Trail: English	Intake Winter semester		Hours per week (SWS) 6	
1	Lectures of the Module		Hours of presence	Hours of self-study	Total work- load (h)	SWS
	Above the Line-Communication		18	42	60	2
	Media Planning		18	42	60	2
	Integrated Communication		18	42	60	2
2	Content In this module, the wide range of traditional marketing communication is mediated related to strategic concepts and instruments. Models and methods of target groups, media and advertising research are constituted, the goal-orientated development of campaigns as part of the strategic planning of communication is explained, possibilities of creative design of promotional materials are demonstrated, tools for planning and budgeting of media distribution are treated and the campaign management of the implementation of integrated communication concepts and coordination of the variety of communication tools is discussed. Above the Line-Communication The course Above the Line-Communication describes in detail the advertising in in the traditional communication tools (TV, radio, cinema, print, outdoor advertising). Besides theories of advertising, the focus is on the advertising communication process and particularly the strategic planning of communications for the analysis, design and development of advertising campaigns. Inter alia it will be covered: briefing, types of communication goals, tasks, models and tools in Strategic Planning, methods for analyzing brands, products, competitions and target groups, derivations of consumer and brand insights, development of effective communication messages, forms of the creative production of messages related to means of advertising and methods of evaluation of communication. Media Planning The course Media Planning focuses in detail the planning process of media agencies. It discusses methods for the analysis of media target groups, teaches the basics and findings of advertising mediums- and advertising research and discusses the evolution of cluster plans on the basis of advertising media selection and indicators of media performance. Other main points of the course constitute strategies to determine the media budgets, principles and rules for modulation of advertising pressure and the evaluation of media plans and the media controlling. Integrated Communication					

ISM-COURSE HANDBOOK

M.A. STRATEGIC MARKETING MANAGEMENT

	The course Integrated Communication deals with foundations, conditions, goals and success factors of integrated communication. The process of integrated communication is extensively illuminated from the conception up to the positioning of issue management campaigns. Furthermore, the specific tasks of organization, management and controlling of integrated communication are covered.
3	Learning outcomes / Competencies The module covers the basic perspective of marketing communication in the context of an integral marketing approach. The 3 classes of the module serve the acquisition of broad and deep knowledge in the field of classical communication tools, media planning and integrated communications. Professional expertise Students are familiar with theories, rules and principles in the field of communication management. They acquire comprehensive knowledge of planning, design, implementation and monitoring of campaigns. They are able to practically apply tools for budgeting, deployment and diffusion of advertisements of Mediaplanning. Students learn to explore communication strategic issues, evaluate and assess them on a company and market-based perspective, to reach an integrated coordination and modulation of above- and below-the-line-appliances based on the findings. Students develop specific problem solving skills with the analysis and evaluation of possible solutions for the design and the execution of marketing communication. Personal competence The students attain an extension of their personal, social and methodological competences by different learning and work settings to support independent development, planning, implementation and organization of the acquired theoretical and methodological knowledge in a team and management context. In particular, by systematically practicing the content of the module based on role-playing games, lectures, case studies in individual and small group formats, students are able to develop their independence and learning skills as well as improve their teamwork and leadership skills in a group context: Students are able to practice the acquired knowledge individually, discuss and reflect possible solutions, and learn to result complex strategy-, planning- and coordination processes goal oriented in comprehensive communication campaigns.

Leadership Skills

Modulecode LS		Semester 1	Duration 1 semester		ECTS-Credits 6	
Course type Compulsory		Teaching Language English	Intake Winter semester		Hours per week (SWS) 6	
1	Lectures of the module		Hours of presence	Hours of self-study	Total work- load (h)	SWS
	Corporate Governance & Business Ethics		18	42	60	2
	Negotiation, Communication & Executive Presentations		18	42	60	2
	Cross Cultural Leadership		18	42	60	2
2	Content The module "Leadership Skills" develops the frameworks, explores the tools, and the methods and skills a manager needs to lead a company in an international environment. The course serves the development of intercultural skills, the training of communication, presentation and negotiation skills as well as the teaching of ethical-normative assistance for decision making in the context of corporate governance system. Corporate Governance & Business Ethics This course deals with the conditions, theories, standards and applications of ethical and sustainable business behavior. Corporate governance will be reconstructed as a central pillar of the notion of corporate social responsibility (CSR), with a special focus on standards and principles for ethics-based, sustainable business strategies. Analysis and implementation of ethical business decisions as well as the benefits and challenges of moral action in the national and international context are main focuses. On a theoretical economic base, a business ethics concept is developed, critically examined and the application spectrum illustrated. Participants will learn to apply different ethical theories and concepts through case studies and interactive seminar sessions. Emphasis is laid on humanistic principles of good leadership. The main focus is on moral challenges and how to overcome them in order to be a good corporate citizen in the national and global context. Governance problems will be analyzed based on various theoretical backgrounds, including the theory of incomplete contracts and business networks as well as the stakeholder approach. Possible information, monitoring and decision rights for stakeholders will be considered in order to achieve sustainable value creation and fair value distribution. Negotiation, Communication & Executive Presentations This course conveys the wide range of interpersonal communication within as well as outside the company. Concepts, models and strategies for team, management and crisis communications are presented, the relationship between goal-oriented, cross-cultural and ethical interaction premises and their integration techniques are discussed, techniques for consensual persuasion results are shown. The training of communication skills as well as the					

ISM-COURSE HANDBOOK

M.A. STRATEGIC MARKETING MANAGEMENT

	training for the realization of set targets takes place through negotiations, role-plays in negotiations as well as by small talk and networking for business communication processes. The course concludes with the structure, the techniques and the practice of presentations, including the different possibilities to use them in meetings and strategies to adapt them to an intercultural context, by modifying the words, images and gestures. Cross Cultural Leadership This course addresses the central models, concepts and theories for successful behavior in leadership and teamwork situations. It covers organizational psychological insights into leadership styles and role behavior, motivation and team effectiveness, the use of power and responsibility in decision-making processes, difficulties in change communication and conflict management as well as corporate hierarchies, framework and success factors. The course focuses on cultural awareness as well as scientific approaches and techniques in the field of intercultural communication and management for a diplomatic and confident manner, for example in bargaining situations in different cultures of the world. Ideas and concepts of cross-cultural management, research on culture and identity concepts (e.g. Hall, Hofstede), and the role of culture in the corporate environment will be presented and the techniques and strategies of verbal, non-verbal and para-verbal communication in intercultural contexts will be trained. Finally, the culture shock and other personal reactions to intercultural encounters will be discussed as well as the manager's toolkit of intercultural skills.
3	Learning outcomes On successful completion of the module, students: ▪ possess knowledge of basic ethical concepts as they apply to business. ▪ are aware of the expectations and perceptions from a company's business community and social environment. ▪ have knowledge of modern leadership and decision-making styles and their state-of-the-art application. ▪ have insights into intercultural management theory. ▪ are able to analyze intercultural business situations. ▪ are able to make prudent business decisions in the face of uncertainty that consider ethical social, regulatory and legal requirements. ▪ are able to assess the advantages of the adoption of social responsibility to identify appropriate decision corridors. ▪ lead decision-making processes and are able to deal with conflicts. ▪ present convincingly in intercultural contexts. ▪ reflect and compare different points of view in groups and organizations. ▪ work constructively and cooperate in a group. ▪ present their positions, discuss them critically and defend them. ▪ convince others and justify their own decisions in a team when needed. ▪ learn from experience regarding negotiation situations and thus to think and act critically. ▪ help to shape their social environment.

Relationship Marketing

Module code RM		Semester 2	Duration 1 Semester		ECTS-Credits 6	
Course type Mandatory		Teaching language German/ English English Trail: English	Intake Summer semester		Hours per week (SWS) 6	
1	Lectures of the Module		Hours of presence	Hours of self-study	Total work- load (h)	SWS
	Services Marketing & Service Quality		18	42	60	2
	Internal Marketing & Behavioural Branding		18	42	60	2
	Customer Relationship Marketing		18	42	60	2
2	Content The relationship management's broad spectrum, including both internal and external reference groups of a company, will be taught. Concepts, models and approaches for internal employee and external customer orientation will be presented. Connections between internal communication, marketing and knowledge processes and the external marketing success will be explained. Both service and CRM strategies and instruments to bind customers will be of great importance. Services Marketing & Service Quality The lecture Services Marketing & Service Quality deals in detail with dimensions, determinants, strategies and instruments of service marketing. The central issue is the specificity of the marketing of services to positively influence customer satisfaction. In addition, the planning and control of a comprehensive quality management system are discussed with regard to the management of service quality. Internal Marketing & Behavioural Branding The lecture Internal Marketing & Behavioral Branding includes organizing and structuralizing market and customer-oriented knowledge management and innovation culture. The focus lies on building up brand knowledge, strengthening brand focused commitments and handling management and staff as well as the organization, internal connection and control of Behavioral Branding. Another important aspect is the attraction and selection of potential Brand Ambassadors by designing and measuring Employer Branding. Customer Relationship Marketing The lecture Customer Relationship Marketing deepens the strategic goals of CRM as well as their operationalization and action generation in the areas of customer orientation, customer satisfaction management, customer loyalty, customer evaluation and customer recovery. In addition, the lecture is dedicated to the practical structure and successful implementation of an appropriate success control of CRM measures such as customer satisfaction measurement and complaint management.					

ISM-COURSE HANDBOOK

M.A. STRATEGIC MARKETING MANAGEMENT

3	Learning outcomes / Competencies The module conveys a relationship perspective into marketing. The three lectures of this module serve to teach broad knowledge regarding marketing in both the external, customer-oriented and the internal, employee-oriented levels. Additionally, to that, organizations in the product and service sector will be of great importance. Professional Skills Students understand marketing as an integral relationship organization. They learn scientific theories and models and also know qualitative and quantitative methods for the analysis and the consistent market-oriented design of customer and employee relationships in companies. The students understand customer satisfaction as a multilateral management task, they can identify relevant service processes on all levels (inside-out and outside-in) and assess customer and employee related challenges. They can also assess and establish strategies and techniques to mobilize and to commit both the employees and the customers to a company. The students can also achieve adequate decisions based on critical evaluations in order to loyalize customers and employees sustainably. The students develop special skills to solve problems especially by using the practical and methodical reception of the TQM and the CRM approach. Personal Competence Students achieve an expansion in their personal, social and methodological competences by varying between different learn and work settings. These will support their abilities to independently conceptualize, plan, carry out and organize strategic and instrumental marketing activities. Their independence and competence to learn is developed especially through systematically studying the module contents by carrying out case studies individually or in small groups. At the same time, the students' ability to communicate and reflect will be improved while additionally expanding their team and leading competences: The students can individually organize and practice the acquired knowledge, discuss options for solutions and reflect on them and also systematically integrate complex strategy, planning and coordination processes.
4	Teaching and learning methods 30 % Lecture 20 % Free classroom discussions 20 % Work in small groups 20 % Case studies 10 % Research- and analysis tasks
5	Prerequisites for participation Formal requirements: none Recommended prior knowledge: basic knowledge of the different kinds and applications of the tools of brand management and integrated communication (first semester)
6	Applicability for this and other programs of study Applicability of content in this program of study: semester abroad, master's thesis as well as market research project, which takes place in the same semester

M.A. STRATEGIC MARKETING MANAGEMENT

Digital Marketing

Module code DM		Semester 2	Duration 1 Semester		ECTS-Credits 6	
Course type Mandatory		Teaching language German English Trail: English	Intake Summer semester		Hours per week (SWS) 6	
1	Lectures of the Module		Hours of presence	Hours of self-study	Total work-load (h)	SWS
	Online Marketing, Online Advertising & Social Media		18	42	60	2
	E-Marketing & E-Commerce		18	42	60	2
	Mobile Marketing		18	42	60	2
2	Content With regard to content, students learn how companies have the ability to successfully organize their product and service design, communication and distribution using digital media. It generates the methodological and technological basic understanding of mobile, online and e-marketing. In addition to the specific analysis of markets, customers and consumption in the sector of digital media, strategies and tools for successful addressing of target groups especially in the context of social media are presented - from classic banner advertising by search engines and e-mail marketing to viral and affiliate marketing. The design of marketing strategies for marketing of digital content (games, songs, videos), information (news, alerts, product information) and transactions (coupons, shopping, video streaming, payments) is presented as well as the know-how about the customer-orientated development, planning and control of digital distribution solutions. In addition, the module discusses the integration of mobile and online campaigns in the marketing and communications mix and the legal challenges and limitations of electronic communication technologies are clarified. Online Marketing, Online Advertising & Social Media The course Online Marketing, Online Advertising & Social Media refers to the definition and classification of Online Marketing, Social Media and Online Advertising to concepts such as outbound marketing, search engine marketing, affiliate marketing, content marketing and inbound marketing (12 x 90 minutes). It covers concepts and types of websites as basic tools of online marketing and presents methods of web analytics and social media monitoring and treats target and advantage orientated references of online activities. In addition to the implementation of successful online strategies and features of the management of online projects, models of business development in the online marketing and methods for monitoring success will be discussed. E-Marketing & E-Commerce The course E-Marketing & E-Commerce deals with the principles and types of successful business models in the e-marketing and e-commerce (12 x 90 minutes). The analysis, development,					

ISM-COURSE HANDBOOK

M.A. STRATEGIC MARKETING MANAGEMENT

	planning and strategic implementation of e-business solutions (for example in-game advertising) and instruments to control the business value chain are priorities of the course. Mobile Marketing The course Mobile Marketing deepens theories and facts about mobile Marketing. Concepts and tools of mobile marketing in terms of SMS and MMS via in-store marketing to mobile multi-channel marketing are discussed. A special focus constitutes the analysis, strategy and implementation of mobile marketing campaigns (mobile user experience, ideation, design) as well as their project management and the possibility of integration of mobile marketing campaigns in the field of online marketing, direct marketing and e-CRM.
3	Learning outcomes / Competencies The 3 events of the module serve the acquisition of broad and profound knowledge in online marketing, e-marketing and mobile marketing. Professional expertise Students are familiar with theories, rules and principles in the field of digital marketing. They acquire comprehensive knowledge of planning, implementation, management and control of communication and sales-oriented marketing activities in the digital media. Students learn to use and evaluate strategies and models for the realization of successful mobile and online campaigns. They are able to analyze and strategically develop e-commerce solutions for the efficient value of companies in the online environment. They are able to integrate mobile and online activities into the overall marketing mix as well as their modulation and evaluation. Personal competence The students attain an extension of their personal, social and methodological competences by different learning and work settings to support independent development, planning, implementation and organization of the acquired theoretical and methodological knowledge in a team and management context. In particular, by systematically practicing the content of the module based on role-playing games, lectures, case studies in individual and small group formats, students are able to develop their independence and learning skills as well as improve their teamwork and leadership skills in a group context: students can practice the acquired knowledge individually, discuss and reflect possible solutions, and learn to develop comprehensive communication campaigns and commercial models in the field of mobile and online marketing based on goal-oriented complex strategy-, planning- and coordination processes..
4	Teaching and learning methods 30 % lecture 10 % free class discussion 20 % small group work 20 % case studies 20 % research and analysis tasks
5	Prerequisites for participation Formal requirements: none

Sales Marketing & Communications

Module code SMC	Semester 2	Duration 1 Semester		ECTS-Credits 6	
Course type Mandatory	Teaching language German/ English English Trail: English	Intake Summer semester		Hours per week (SWS) 6	
1	Lectures of the Module	Hours of presence	Hours of self-study	Total work- load (h)	SWS
	Price Management	18	42	60	2
	Direct Marketing	18	42	60	2
	Sales Promotion	18	42	60	2
2	Content With regard to content, tasks, models and tools to pricing and sales-related communication policy are approached. The course discusses methods for optimal pricing and provides the know-how to manage pricing decision, strategy development, implementation and monitoring in trade as end customers. Concepts, tools and techniques for sales promotion and direct marketing are presented and the planning, implementation and monitoring of sales promotion and direct response campaigns are discussed. The relationship between price management, Sales Promotion and Direct Marketing and its integration into the overall marketing concepts and marketing mix are discussed in detail. Price Management The course Price Management refers to the foundations and determinants of price determination in different market forms. The analysis of key success factors (price-volume capabilities, price elasticity, etc.) and the strategic process of price determination are the focus of the course. Newer concepts such as value-based pricing are treated as tactics in strategic price management of implementation, management and control of pricing strategies. Direct Marketing The course Direct Marketing deals with the theoretical principles, tools and application areas of direct marketing (12 x 90 minutes). The focus is on the analysis (including database marketing, foreign address sourcing), Strategy and exploitation (including lead management, mailings and telemarketing) as well as evaluation tools (including look-course analysis, scoring method and construction of test scenarios). Use and evaluation of KPIs to measure success and the integration of direct marketing activities in the online marketing and the overall mix round off the course. Sales Promotion The course Sales Promotion deepens theoretical insights and approaches of different instruments such as in the consumer-oriented as well as in the range of trade sales promotion. Types, characteristics, objectives and profitability of different forms of promotion (such as consumer				

ISM-COURSE HANDBOOK

M.A. STRATEGIC MARKETING MANAGEMENT

	promotions, trade promotions, temporary price reductions, multi-item promotions, coupons and extra promotions) form the focus of the course. Practical tools for planning, operationalization, performance measurement and modeling (e.g. pro model and logit model for brand choice) are also discussed as critical factors between manufacturers, retailers and consumers in the course of a successful implementation of sales promotion measures.
3	Learning outcomes / Competencies This optional module focuses on the price- and sales-related aspect in marketing. The 3 courses of the module serve to the acquisition of broad and deep knowledge of the price management, direct marketing and sales marketing. Professional expertise Students are familiar with theories, rules and principles in the range of strategic pricing and the operational-instrumental price realization. They acquire comprehensive knowledge of planning, implementation, management and controlling in the context of the strategic price management, on which the instruments of price and sales-oriented communication align efficiently. They are able to apply strategically, measure and evaluate methods and application possibilities of sales promotion, direct response campaigns and direct sales. They are able to control the integration and modulation of these sales-orientated measures in the overall marketing mix. Personal competence The students attain an extension of their personal, social and methodological competences by different learning and work settings to support independent development, planning, implementation and organization of the acquired theoretical and methodological knowledge in a team and management context. In particular, by systematically practicing the content of the module based on role-playing games, lectures, case studies in individual and small group formats, students are able to develop their independence and learning skills as well as improve their teamwork and leadership skills in a group context: Students can practice the acquired knowledge individually, discuss and reflect possible solutions, and learn to result complex strategy-, planning- and coordination processes goal oriented in sales-orientated marketing campaigns.
4	Teaching and learning methods 35 % lecture 15 % free class dicussion 10 % small group work 20 % case studies 15 % research and analysis tasks 5 % specials (for example, guest speakers, field visits)
5	Prerequisites for participation Formal requirements: none Recommended prior knowledge: basic knowledge of the different kinds and applications of the tools of brand management and integrated communication (first semester)

Public & Publicity Communications

Module code PP		Semester 2	Duration 1 Semester		ECTS-Credits 6	
Course type Mandatory		Teaching language German English Trail: English	Intake Summer semester		Hours per week (SWS) 6	
1	Lectures of the Module		Hours of presence	Hours of self-study	Total work- load (h)	SWS
	Event Marketing & Sponsoring		18	42	60	2
	Product Placement & Branded Entertainment		18	42	60	2
	Public Relations		18	42	60	2
2	Content With regard to content, the theoretical foundations of below-the-line communications and empirical findings on success factors and framework for the conceptualization and strategic direction of event, PR and branded entertainment campaigns for the successful achievement of the set communication objectives are mediated. The variety of communication activities is presented and their characteristics in the planning, design and implementation are explained. The opportunities and limitations of these below-the-line tools for staging of companies and brands in the pan-social and target-group-related opinion are shown, legal conditions on the content and placement in media formats are reflected and communicative integration into the overall-orchestration of the product, brand and corporate communications are treated. Event Marketing & Sponsoring The course Event Marketing & Sponsorship refers to fundamentals, types and instruments of event marketing. Besides of defining the event marketing objectives, analysis and determination of relevant target groups and the development of event marketing strategy the course deals with the planning process in event management to design and multi-sensual staging of the conception of events as well as event law and methods of Event Controlling. Another focus is on kinds of sponsorship and strategic sponsorship planning as part of the event marketing. The planning and integration of event communication in the overall communications mix is presented. Product Placement & Branded Entertainment The course Product Placement & Branded Entertainment deals with the principles and components of product placement concepts in detail, as well as the legal aspects and special challenges of product placement in Germany. It discusses significant product placement forms in cinema, television and PC and online games. The product placement planning process from the perspective of advertisers, agencies and TV channels as well as TV marketers is presented and quality criteria for the integration of product placement in the perspective of viewers, media companies and advertisers are discussed. Another focus is on knowledge of the entertainment research for the successful development of branded entertainment. Scenario analysis, player					

ISM-COURSE HANDBOOK

M.A. STRATEGIC MARKETING MANAGEMENT

	models and dramaturgy filmic narratives are presented as components of a branded entertainment concept and complemented by indicators for monitoring the success of branded entertainment offerings such as web series in the context of transmedia offers or alternate reality games. The integration of product placement and branded entertainment within the communications mix is appreciated. Public Relations The course Public Relations deepened the principles and forms of PR and generates a classification of PR in the field of marketing, advertising, corporate identity, journalism and public relations (12 x 90 minutes). The central PR disciplines are treated as product PR, brand PR, corporate PR and networking of traditional PR with social media, viral marketing and guerrilla PR up to public affairs, reputation management and crisis PR. Another focus is on the planning, strategy, design, implementation and monitoring of PR campaigns and their integration into the overall communication performance of companies.
3	Learning outcomes / Competencies This module offers a specialization in the field of high-profile below-the-line communication. The 3 events of the module cover the acquisition of broad and deep knowledge in event marketing and sponsorship, product placement and branded entertainment as well as public relations. Professional expertise Students are familiar with Rules and principles in the field of below-the-line communication. They acquire comprehensive knowledge of planning, design, implementation and monitoring of campaigns. They are able to use tools for budgeting and apply event-, placement-targeted and PR-related communication tools practically. Students learn to explore communication strategic issues to evaluate and assess on a company and market-related perspective in order to attain an integrated coordination and modulation of the below-the-line instruments in the overall communications mix on the basis of the findings. Students develop specific problem solving skills for the analysis and evaluation of possible solutions for the design and orientation of below-the-line communication. Personal competence The students attain an extension of their personal, social and methodological competences by different learning and work settings to support independent development, planning, implementation and organization of the acquired theoretical and methodological knowledge in the context of below-the-line communication. In particular, by systematically practicing the content of the module based on case studies in individual and small group formats, students are able to develop their communication and reflection skills as well as team and leadership skills in a group context: Students can practice the acquired knowledge individually, discuss and reflect possible solutions, and learn to result complex strategy-, planning- and coordination processes goal oriented in comprehensive communication campaigns.
4	Teaching and learning methods 30 % lecture 20 % free class discussion 20 % small group work 15 % case studies

M.A. STRATEGIC MARKETING MANAGEMENT

Market Research / Consulting Project

Module code MP		Semester 2	Duration 1 Semester		ECTS-Credits 6	
Course type Mandatory		Teaching language German/English English Trail: English	Intake Summer semester		SWS 4	
1	Lectures of the Module		Hours of presence	Hours of self-study	Total work-load (h)	SWS
	Market Research / Consulting Project		36	144	180	4
2	Content In the module Market Research / Consulting Project students work on an business research question from the field of market research (in some cases in combination with a problem from the areas of brand or communications consulting). They act on their own authority in a team and within a limited timeframe. The question has to be methodically and theoretically sound and it has to be substantiated by empirical surveys. Consulting projects have to entail the development of a concept for the solution of the problem in addition to the empirical analysis. In these cases, the initial market research is not as extensive/complex as in a project that focus exclusively on market research. The module is designed so that students apply previously gained and newly acquired subject-specific, methodical and empirical knowledge, develop scientifically sound solutions for problems in the area of marketing and also improve social competencies. Whenever possible, the module is conducted in cooperation with a business partner Ideally the project covers the following aspects: ▪ For consulting projects: preparation and follow-up of a briefing; ▪ Introduction of and familiarization with the subject as well as development of a project schedule that includes mile stones; ▪ Development/Definition of a research issue or problem; ▪ Familiarization with the theoretical basics of the research issue; ▪ Development of a study design and selection of appropriate research methods; ▪ Data collection and data preparation; ▪ Data analysis and interpretation of results; ▪ Preparation of results; ▪ Presentation of results; ▪ For consulting projects: development of strategic and action-oriented recommendations, i.e. specific measures derived from the results of the analysis ▪ Final report. Intermediate steps and results have to be presented to and discussed with the lecturer in status presentations that have to adhere to the usual formal requirements. The assessment of the project is based on the correct application of relevant research methods, the final presentation as well as the final report, the project and teamwork and the commitment of the individual team members. For consulting projects, the completeness and quality of the strategic elements (goals, target groups, strategic idea including messages and the derivation of coherent sets of					

ISM-COURSE HANDBOOK

M.A. STRATEGIC MARKETING MANAGEMENT

	measures) as well as the logical fit of the overall concept in the light of the briefing and/or the definition of the problem are also considered in the assessment. The project is the “practical counterpart” to the theory-oriented module “Market Research” in the first semester, as well as the module “Strategic Marketing” if the project entails consulting efforts. The project is supposed to relate to the research questions of the module “Market Research” and serve as a target-oriented application of quantitative and/or qualitative methods.
3	Learning outcomes / Competencies Professional skills Students are able to work on a practical business research question and apply the quantitative and qualitative methods of the first semester. They recognize the possibilities and limits of empirical research in practice. Students have in-depth knowledge of scientific work and they have acquired relevant skills to conduct empirical research. Personal competence Students will be better able and more willing to work with others in a goal-oriented fashion. Students will be better able and more willing to act independently and responsibly, and further develop their capacity for action.
4	Teaching and learning methods ▪ Free class discussion ▪ Small group work ▪ Research and analysis tasks ▪ Design tasks ▪ Other
5	Prerequisites for participation Formal requirements: none Recommended prior knowledge: contents of the modules “Market research” and the course “Strategic Marketing” of the first semester
6	Applicability for this and other programs of study Applicability of content in this program of study: The project can be seen as practice for the writing of a thesis. Applicability in other study courses: none
7	Type and duration of exam Presentation
8	Weighting of the exam grade in the total grade 5.56% with 4 semesters (120 ECTS-Credits) 7.14% with 3 semesters (90 ECTS-Credits)

ISM-COURSE HANDBOOK

M.A. STRATEGIC MARKETING MANAGEMENT

9	Special The module is usually conducted in cooperation with a business partner (company, agency), which assumes the role of the customer.

M.A. STRATEGIC MARKETING MANAGEMENT

Semester Abroad

Module code AU		Semester 3	Duration 1 Semester		ECTS-Credits 24
Course type Compulsory (only 120 ECTS program)		Language depending on the country	Intake winter semester		Hour per week (SWS) depending on the host university
1	Lectures of the module		Hours of presence	Hours of self-study	Total workload (h)
	Semester Abroad		depending on the host university		720
2	Content The content of the study abroad phase will be coordinated and agreed upon between the partner university, the head of the degree program, the international office, and the student in an individual learning agreement. The semester abroad will contribute significantly to students' personality development by allowing them to undergo an academic (subject-specific and cross-subject) and personal process of maturity. At least 50 percent of the courses completed must be from their field of study, while a maximum of 50 percent of the courses can be freely chosen as part of the "General Studies with an emphasis on Business"" program. Business language modules can only be taken as additional electives. The subject-specific content can come from all marketing-relevant areas, this includes not only the core marketing areas but also related specialist areas such as psychology (market psychology, consumer psychology, etc.) or communication science (communication processes, education of public opinion, etc.). Students can obtain a current overview of the selectable degree-specific courses from the International Office's MOVEON database.				
3	Learning outcomes / Competencies Intercultural and social competency and an understanding of the major factors in this field are competitive factors that are crucial for success in the world of business. Thus, the semester abroad is a major prerequisite for a successful career as a marketing expert in international management. Expertise (knowledge and skills) Through their insight into marketing education in other European countries, the students have a broad and integrated knowledge in the field of marketing, including in-depth knowledge of the current professional discourse in the respective host country. Furthermore, they will be able to transfer the skills and abilities acquired in semesters 1-3 to an international application context (e.g. in fields such as brand management, marketing, or market research). Students will be able to deal with complex relationships, to systematically assess them while also considering intercultural and transnational aspects, and to develop new solutions, which				

ISM-COURSE HANDBOOK

M.A. STRATEGIC MARKETING MANAGEMENT

	may be cross-national. They will be able to consolidate and integrate knowledge from various related fields. General competencies (social competence and autonomy) Upon successful completion of the module, students will be able to - Collaborate in an international group in a goal-oriented and constructive manner, and in doing so help shape their social environment. They can reflect on varying standpoints while taking into account cultural differences in groups and organizations, compare them, and discuss them in a manner geared towards increasing understanding. Where necessary, students may take a leading role in a team, convince others of a particular approach, and present their assessment to others. - Work independently: Students will possess well-developed self-organizational skills and confidence thanks to the independently organized study abroad phase or semester program at the partner university, which they have independently planned, in some cases entirely without help, and successfully completed.
4	Teaching and learning methods Depending on the teaching and learning methods of the host university.
5	Prerequisites for participation See examination regulations
6	Applicability for this and other programs of study Applicability of content in this course of study: None Applicability for other study courses: - Subject-specific modules: not applicable for other courses of study "General Studies": numerous interfaces with other courses of study
7	Type and duration of exam According to the exam regulations of the respective partner university.
8	Weight of the mark in the final grade 22,22 % with 4 semesters (120 ECTS-Credits)
9	Special Group work with domestic and international students, guest lectures, approximation to new topics and educational approaches of the respective cultural circle, lectures in a foreign language, strengthening of negotiating confidence in a foreign language.
10	Literature According to the recommendations or stipulations by the partner universities. Supplementary recommendations – aligned to the respective study program of the attended partner university – from head of department and lecturers at ISM.

ISM-COURSE HANDBOOK

M.A. STRATEGIC MARKETING MANAGEMENT

Internship

Module code PR		Semester flexible	Duration 12 weeks (120 ECTS program) or 6 weeks (90 ECTS program)		ECTS-Credits 12 (120 ECTS program) or 6 (90 ECTS program)	
Course type Compulsory		Language Depending on the company	Intake Each semester, in the semester break		Hours per week (SWS) 0	
1	Lectures of the module		Hours of presence	Hours of self-study	Total work-load (h)	SWS
	Practical experience phases (120 ECTS program)		0	360	360	0
	Practical experience phases (90 ECTS program)		0	180	180	0
2	Content Domestic and overseas internships provide students with an initial insight into the requirements of the working world of business and confront them with socialization aspects, occupational problem areas, and various real-world work requirements. Furthermore, theoretical knowledge and experiences gained in the study program can also be applied in practice. The practical phase should be related to partial aspects of the study program, and may take place in the following areas, for example: ▪ Work in the marketing departments of companies, e.g. in communication, product management, or market research ▪ Work at market research institutes (quantitative and qualitative market research). ▪ Work at advertising agencies (design of advertising materials, pitch preparation, etc.) ▪ Work at management consultancies with a focus on brand management ▪ Work at PR or online agencies (press relations, SEO/AEM, social media marketing, etc.) ▪ Work in the communication departments of governmental organizations (government agencies, etc.) ▪ Work with non-governmental organizations/non-profit organizations (e.g. in fundraising) Other marketing-relevant practical experiences can also be used for study credit with prior permission from the head of the degree program.					
3	Learning outcomes / Competencies Expertise (knowledge and skills) Upon successful completion of the module, students will be able to ▪ apply the theories and models learned to date to real world marketing practice, and verify their applicability. ▪ anticipate the effects of their own actions and the resulting consequences. ▪ reflect on the effects of their own actions and behavior and/or the effects of external conditions on the work process.					

ISM-COURSE HANDBOOK

M.A. STRATEGIC MARKETING MANAGEMENT

	General competencies (social competence and autonomy) Upon successful completion of the module, students will be able to ▪ Forge professional relationships with people from various backgrounds and hierarchical levels. ▪ Identify, reflect on, and represent their own role in the organizational structure. ▪ Critically reflect on ethical issues of their job in the company. ▪ Critically question their own communication, relationship, and self-management competencies. ▪ Solve practical problems with the aid of structured planning and work techniques. ▪ Deal with conflict and stress situations on the job.
4	Teaching and learning methods "Learning by doing" in an internship; possible individual guidance for optimizing job applications / job coaching / job search strategies.
5	Prerequisites for participation Formal requirements: None Recommended prior knowledge: In addition to intensive preparations by the student with an eye on the content and goals of an internship, the conditions in the internship company are also important for quality assurance; i.e. the intern is to formulate clear agreements on duties, goals, his/her workspace, and an internship adviser with the company in advance. These are also mandatory components of the final report. Furthermore, participation in corresponding courses at the Career Center is mandatory for students to build their own occupational biography profile.
6	Applicability for this and other programs of study Applicability of content in this program of study: In particular, the experiences in the practical module may provide stimulus for choosing the topic of the master thesis. Applicability for other programs of study: Mandatory module in the master's degree courses International Management, Psychology & Management, Luxury, Fashion & Sales Management, International Logistics & Supply Chain Management, and Finance. Amount of credit that can be awarded depends on the job scope in the internship.
7	Type and duration of examination Internship report
8	Weight of the mark in the final grade 0 %
9	Special The student's sense of responsibility and initiative will be encouraged and challenged.
10	Literature Relevant literature (print and online media); comprehensive offerings on the ISM intranet section of the Career Center: including the ISM internship database, ISM job portal, notifications

ISM-COURSE HANDBOOK

M.A. STRATEGIC MARKETING MANAGEMENT

Master's Thesis

Modul code		Semester 4 (120 ECTS program), 3 (90 ECTS program)	Duration 1 Semester		Intake Each semester	
Language: English		Type and duration of exam: Thesis and disputation - Length of the thesis: 25,000-30,000 words - The editing time: Master's Thesis = 18 weeks; - Disputation: Presentation and scientific discussion	Weight of the mark in the final grade 27.78 % with 4 semesters (120 ECTS-Credits) 35.71% with 3 semesters (90 ECTS-Credits)		ECTS credits 30	
1	Lectures of the module		Hours of presence	Hours of self-study	Total work-load (h)	SWS
	Master's Thesis		1	899	900	0
2	Content The Master's thesis is a written final assignment addressing a complex issue within the respective field of study. It is intended to demonstrate that the candidate is capable of independently completing a practice-oriented task from their field within a specified period of time, applying both subject-specific knowledge and interdisciplinary connections using scientific and professional methods. In doing so, the subject-specific and methodological competencies acquired during the Master's program should be applied in a targeted manner. The ideal procedure for the preparation of the Master's thesis is as follows: - Identification and refinement of the topic - Definition of the research question, title, (rough) structure, scheduling and research design - Identification and analysis of relevant theoretical contexts and independent literature research on state of the art knowledge as well as related work - Logical structuring of the thesis - Methodological handling of the question (of quantitative and/or qualitative nature) - Documentation of the study and its results according to the instructions (e.g. formal requirements of the ISM or DGPs or APA guidelines) - Regular coordination with the first examiner - Disputation (oral examination)					
3	Learning outcomes Upon successful completion of this module, students will be able to: - demonstrate a broad, detailed, and critical understanding of the current state of research in the field relevant to the thesis topic, based on systematic literature review. - develop and clearly structure complex research questions and translate them into an appropriate research design.					

ISM-COURSE HANDBOOK

M.A. STRATEGIC MARKETING MANAGEMENT

	▪ select and apply appropriate theories, concepts, and research methods to address the research question. ▪ collect, analyze, and interpret data in a systematic and methodologically sound manner. ▪ integrate findings into the existing body of research and, where appropriate, derive practical implications for business practice. ▪ structure and manage complex research and practice-oriented projects largely independently. ▪ develop well-founded and innovative solutions to business-related problems based on scientific approaches. ▪ communicate complex ideas and research results clearly, logically, and convincingly in written and oral form. ▪ present and defend research results in a disputation and engage in academic discussion with both specialists and non-specialists.
4	Teaching and learning methods Independently written paper. Disputation. ▪ Individual and regular advice provided by the first examiner.
5	Prerequisites for participation Formal requirements: see examination regulations
